# **How Water Dreams Are Linked With Our Sentiments**

Most often, the dreams that we come across are too strange. The strange part is that they have a persuasive force about them, which makes us wonder if that they can become a reality. Some dreams are pleasant when others are not so pleasant. Dreaming is not something voluntary, it happens quite sudden. For instance, you may like a dream in which you are on fishing and camping excursion in a luxurious [floatplane charter](#) or [floatplane to Tofino](#). But, all dreams relating to water are not so pleasant. There are a few people who see the threatening floods in the city or the destruction done by hurricanes or river flood. Water in dreams often signifies some meaning. It's a sense that only you can make out at the end of the day. But, there has been a long record of water symbolism that can help you derive the meaning of your dream somehow.

Previously, things related with water or fluids were recognized as things associated to our surrounding. The Greeks used to refer all watery things as the Realm of Poseidon, Lord of oceans etc. The logic behind this belief was that the earth rested upon water. And of course land is our domain.

Therefore, psychologically speaking, we are the creatures who rely upon our own emotional world. Our talent to reason would cease to exist when we fear or are in anger. For instance, if you are dreaming of an approaching ocean wave, then this means that you have restlessness about the feelings welling up inside you. Likewise, drowning shows that you have a fear that is much empowering, and it seems as if you don't have any control in your actual world.

As for floods, they are thought to create something different for you. In earlier times, some mythic kingdoms were thought to have drowned by their Gods to create something different. If you see too many floods in your dreams, then it's a symbol that you are going through a turn in your life. For the person who has such dreams, the devastation in itself is not as terrifying as the fear can be which tells why we get a feeling of awe and wonder before any natural disaster.

Those who dream about a watery destruction can tackle this dream problem if they know how to take the full impact and strength of their emotions. This will make you more conscious of your fear, and you can learn to survive through the problem you fear the most. The moment we become completely aware of the water, we can get skill to breathe water in our dreams. It will occur to you after the adjustment with the different style of living. You might, still, want to remember that the Poseidon Watery Realm is quite huge as it carries a whole universe of meaning. No doubt your dreams can go wild but they still have a limit. So the meaning of these water dreams depends on your exploration of its several paths. The significance of a dangerous water dream differs from person to person, and only you are the person who can understand the meaning of your dream.
