Worlds Best Golf Course Being Built?

There have been a lot of angry protesters around plans by Donald Trump to create a £1bn golf resort and there are many reasons for this.

Negatives

Homes

One of the biggest negatives is that it would force people out of their homes and although Trump has offered support to these people if they are happy where they are why on earth should they have to even think about leaving?. People should not have to drop everything they know and love for a golf resort?

Eyesore

On the whole golf courses are beautiful areas of land it would seem that an entire resort is supposed to be being built here which would mean an eyesore on the very beautiful landscape north of Aberdeen.

Positives

Money

The resort would bring in many jobs to the area as well as providing the council with a lot of money from things like membership fees and looking after the grounds themselves. It is also good because it can attract tourists to the area and this is great because it would be a brand new form of revenue for the place.

Best Golf Course

If this idea actually works and Trump manages to make the best golf course in the world then surely this is something that Aberdeen, Scotland and the entire UK should be proud of having, its something that the Americans dont have at the very least. People would flock in from all over the world just to sample a hole of the course let alone play the entire thing.

It would encourage people to get those [golf batteries](#) out so that they can have a bit of fun. [12v batteries](#) and [marine batteries](#) can also be used to power up all kinds of different golf trolleys.
